(CD Only)

This mission directive states the mission, organization, and functions for Air Force Reserve Command (AFRC) intelligence flights (IF).

SUMMARY OF REVISIONS

This revision redesignates the Air Force Reserves (AFRES) to Air Force Reserve Command (AFRC) and updates applicability.

1. Mission:

1.1. Peacetime. The primary mission of the IF is to train to provide command, control, and communications protection and a communications jamming reserve capability; specifically, to conduct communications monitoring and analysis operations to support the Air Force Communications Security Program during wartime.

1.2. Wartime/Emergencies. Governed by gaining command directives.

2. Command. IFs are assigned to the 610th Regional Support Group (RSG). The peacetime structure of the intelligence flight design maintains effective operations with the most practical expenditure of resources and minimizes organizational turbulence upon wartime mobilization. The intelligence flight functionally aligns for structural compatibility with active duty counterparts. Functional statements, applicability, and organizational structure are in attachment 1, attachment 2, and attachment 3.

3. Assigned Forces. While in a peacetime status and during 2 weeks of annual training, the intelligence flight is under the direct control and supervision of the RSG to which it is assigned. Under a Presidential call-up, pursuant to Title 10, U.S.C. 12304, administrative jurisdiction remains unchanged. Operational control transfers to the commander of the gaining command. Under mobilization authority, command jurisdiction transfers to the commander of the unit to which assigned by the gaining command.

4. Relationships to Other Units. Established command channels apply. Communicate directly with the active duty advisory unit/active duty advisors on matters relating to training, inspection, and safety. Send a copy of such correspondence to the respective unit to which assigned.

5. Special Instruction. Deviations to the organizational structure depicted in attachment 1 and attachment 3 are not authorized without prior approval of HQ AFRC/XPM. Submit deviations requiring Air Force approval (those not in compliance with the provisions of AFI 38-101, *Air Force Organization*) according to AFI 38-101, chapter 5. All other deviations/changes include as a minimum:

- 5.1. Resumes of each recommended change with narrative justification. Also, a brief discussion of why the current organization is ineffective.
- 5.2. Current and proposed organization charts down through the lowest level, authorized and proposed manpower by grade, Air Force specialty code, and number.
- 5.3. Functional statements in brief and concise language, present tense, restricted to major functions or programs of the activity.
- 5.4. Position descriptions for any new or revised civilian positions.

DAVID S. SIBLEY, Brig Gen, USAFR
Assistant Vice Commander

Attachment 1

FUNCTIONAL STATEMENTS FOR INTELLIGENCE FLIGHTS

COMMAND: Exercises command jurisdiction over all activities of the unit. Formulates plans and establishes procedures pertaining to the accomplishment of the assigned mission. Administers to the general welfare and morale of assigned personnel.

ADMINISTRATION: Provides administrative services for all assigned/attached personnel. Manages unit administrative functions such as temporary duty, on-the-job training, career development, reenlistments, promotions, etc. Monitors unit readiness status and implements programs to assure preparedness for mobilization contingencies and wartime emergencies. Prepares and distributes correspondence. Provides personnel support and data updates to the automated data processing system.

INTELLIGENCE: Provides the commander, unit operations staff, base support staff, and combat control team members current and timely information on foreign/hostile force capabilities, and probable courses of action which might affect unit operations. Provides mission planning support and mission folder construction support. Develops and issues supplemental directives and plans annexes to applicable contingency and exercise plans and operation orders. Obtains and maintains intelligence publications necessary to support the unit mission.

COMMAND CONTROL COMMUNICATIONS COUNTERMEASURES: Responsible for collecting and processing friendly command control and communications electronic emissions. Operates fixed and mobile command control communications countermeasures collection equipment. Plans and organizes defensive command control communications countermeasures operations. Conducts jamming and deception operations against hostile communication and radio electronic emissions.

LOGISTICS MAINTENANCE: Responsible for those activities associated with the maintenance of NAVAIDS and radio relay equipment activities used primarily in the ground environment. This consists of transmitter sites, receiver sites, aeronautical stations, intersite radio equipment, and command post radios.
